

the red book

future aircraft values (fav) 2009-2029

Using the sophisticated **mba** model, Future Aircraft Values (FAV) provides the most accurate assessment of aircraft values forecasted for the next 20 years. It also includes a current market analysis for each aircraft, as well as vital statistics and economic summaries.

The FAV is an annual publication issued at the beginning of the year and includes a mid-year update of values. All publications include a CD-ROM of Excel files containing Current Market Price and Base Values, as well as Future Base Values for each aircraft type.

fav - jet transport

provides current and future values of over 70 jet transport aircraft types by year of build.

Price: \$1,675

fav - cargo aircraft

provides current and future values of over 30 cargo aircraft types by year of build.

Price: \$995 (\$795 if ordered with FAV - Jet Transport)

fav- regional aircraft

provides current and future values of over 50 regional jet and turboprop aircraft types by year of build.

Price: \$795 (\$595 if ordered with FAV - Jet Transport)
